	blood Type o	
Generally, the following applies:		
Gluten, wheat & corn	disrupt insulin production and slow down metabolism.	
Kidney beans	impair calorie utilization, leading to weight gain.	
Lentils	make muscle tissue more alkaline, which is unhelpful.	
Cabbage, Brussels sprouts, cauliflower	inhibit thyroid hormone.	
Red meat, kale, spinach, broccoli, liver	promote metabolic performance.	
Kombu, Wakame seaweed, fish, iodized salt, seafood	contain iodine, which increases thyroid hormone production.	
	The Type O is a Hunter	
	7,	
Strenghts:	Robust digestive system, strong immune system, natural defense against infections, body determines effective metabolism and nutrient retention.	
Weaknesses:	Over-sensitive to new dietary and environmental conditions, tendency towards an overactive immune system.	
Disease Risks:	Blood clotting disorders, inflammatory diseases such as arthritis, low thyroid hormone production, ulcers, allergies.	
Dietary Profile:	High in protein! Meat, fish, vegetables, fruit, limited grains, beans, legumes.	
Weight Reduction:	Avoid: Wheat, corn, kidney beans, lentils, cabbage, dairy products. Increase: Seaweed, seafood, red meat, kale, spinach, broccoli, olive oil.	
Nutritional Supplements:	Vitamin B (boosts metabolism), Vitamin K, calcium, iodine, licorice, seaweed.	
Fitness & Sport:	Intensive physical activity like boxing, jogging, martial arts, cycling, swimming, endurance sports (at least 3 times per week).
